

AYUDAS PREDOCTORALES AECC BIZKAIA 2022

Adjudicatarios

D^a. Esther Rey Iborra

Instituto de Investigación Sanitaria
Biocruces Bizkaia

Novel precision immunotherapies for
high-risk pediatric neuroblastoma

D^a. Naiara Gutiez Garcia

CIC Biogune

Prevention and Treatment of
Fusobacterium associated colorectal
cancer using specific tannase enzyme
inhibitors.

D^a. Maria Larrinaga Ruiz

Universidad del País Vasco
(UPV/EHU)- Vizcaya

Cellular and exosomal CEMIP protein
in melanoma progression. Study of its
potential as an early prognostic
biomarker

Suplentes

D. Marc Liebana Jordan

CIC Biogune

Development of new therapies based
on extracellular vesicles (EVs) as
pharmacological nano-vehicles in
cancer

D. Connor Parry

CIC Biogune

Understanding the impact of obesity
on breast cancer tumorigenesis and
recurrence

D. Ekaitz Madariaga Carrero

Universidad del País Vasco
(UPV/EHU)- Vizcaya

Mechanisms of resistance and
sensitivity to chemotherapy involving
the RB/E2F axis in colorectal cancer:
Identification of novel therapeutic
targets

D^a. Aintzane Rodriguez Barrante

Universidad del País Vasco
(UPV/EHU)- Vizcaya

Study of the therapeutic potential of cellular communication governing aggressive prostate cancer.

D^a. June Olazar Intxausti

Universidad del País Vasco
(UPV/EHU)- Vizcaya

Tetrafunctional probes to identify organelle-specific protein-cholesterol interactions in colorectal cancer cells

D^a. Aurora Arroyo Jimenez

CIC Biogune

Impact of neddylation and its modulation on the antitumor immune response
