

AYUDAS INVESTIGADOR AECC 2022

Adjudicatarios

Dr. Alejandro Prados Martin Institut de Recerca Biomèdica - IRB Barcelona	Unveiling Fibroblast Dynamics to treat Advanced Colorectal Cancer
Dr. Víctor Manuel García Martínez Instituto de investigación Hospital 12 de octubre - i+12	New perspectives to improve bacillus Calmette-Guerin (BCG)- immunotherapy in non-muscle invasive bladder cancer
Dra. Jeannine Diesch Institut de Recerca Contra la Leucèmia Josep Carreras-IJC	A functional approach to accelerate the development of combinatorial drug therapies in blood cancers
Dr. Kass Youssef Khalil Instituto de Neurociencias de Alicante, UMH-CSIC	The role of cancer cells-neurons interactome in breast cancer evolution to malignancy and resilience to therapy
Dra. Talia Velasco Hernandez Institut de Recerca Contra la Leucèmia Josep Carreras-IJC	Identificación of new therapeutic targets to avoid relapse and chemoresistance in Acute
Dra. Diana Aguilar Morante Instituto de Biomèdica de Sevilla (IBIS)	Unravelling functional interplay between R-loops and Replication- Transcription Conflicts as a novel therapeutic target in High-Risk neuroblastoma tumours
Dra. Alba Rodriguez Garcia Fundació Clínic per a la Recerca Biomèdica	Next-generation of chimeric antigen receptor (CAR)-T cells for the treatment of solid tumors

Dr. Jonathan Barroso Gonzalez
Centro Nacional Investigaciones
Oncológicas (CNIO)

Development of specific TOP2 inhibitors to enhance cancer cell sensitivity to TOP2 poisons. A synthetic lethal combination for ATM-deficient tumors?

Dr. Néstor García Rodríguez
Centro Andaluz de Biología Molecular
y Medicina regenerativa (CABIMER-
CSIC)

Sensing and dealing with DNA damage during replication as a critical barrier for carcinogenesis

Dr. Juan Antonio Fafian Labora
Universidad de La Coruña

Intercellular communication through small extracellular vesicles in the ferroptosis process in epithelial ovarian cancer
