

Ayuda Clínico Junior en el Territorio AECC 2023

Adjudicatarios

D^a. Sofía España

Instituto de Investigación Germans Trias i Pujol (IGTP)

Integration of specific and interspersed genetic and epigenetic signals as a multi-tool to type colorectal cancer (GEALUS)

D^a. Carme García

Complejo Hospitalario Universitario de Ourense

Colonoscopy versus fecal immunochemical testing in colorectal cancer screening in average and high risk (adenoma resection) populations: COLONPREV and POLYPREV studies

D. Álvaro Díaz

Instituto de Investigación del Hospital La Fe de la Comunidad Valenciana (IISLAFE)

Diagnostic and prognostic refinement by optical genomic mapping in patients with myelofibrosis and unsuccessful karyotype

D. Miguel García

Hospital Universitario Ramón y Cajal

PREMIUM PROJECT: Predicting ExtreMe response to Immunotherapy in lUng cancer through Microbiota fingerprint

D^a. Raquel García

Instituto de Investigación Sanitaria Pere Virgili (IISPV)

Stereotactic Ablative Radiotherapy for Oligometastatic Breast Cancer: a radiomics, multi-omics and machine learning approach in clinical decision-making. The OBC-SABR multicentric project

D. Arturo Lecumberri

Instituto de Investigación Sanitaria de Navarra (IdiSNA)

Development of innovative CAR-T cell therapies for solid tumors: identification of target antigens in gastrointestinal tumors

D. Fernando Alberca

Instituto de Investigación Biomédica de Málaga (IBIMA)

Precision medicine applied to bladder cancer rol of autotaxin as a new specific therapeutic target

fundación científica
asociación española
contra el cáncer
