

Ayudas Predoctorales AECC 2024 Aragón

Adjudicatarios

D. Eduardo José Aranda

Instituto de Investigación Sanitaria
Aragón (IIS Aragón)

Immunotherapy as a therapeutic opportunity for metastatic patients with a highly inflammatory phenotype: towards precision oncology

Suplentes

D.^a Cristina Alierta

Universidad de Zaragoza (UNIZAR)

Deciphering the contribution of interferon signalling pathway to tumor progression and immunotherapy resistance in the context of pancreatic and lung cancer

D.^a Beatriz Beriain

Instituto de Investigación Sanitaria
Aragón (IIS Aragón)

Development of immunotargeted tools for diagnosis monitoring, and treatment of osteosarcoma

D. Siavash Sohangir

Instituto de Investigación en Ingeniería
de Aragón

Development and implementation of advanced Multi-Phasic computational modeling for cancer cell research

D.^a Laura Artal

Instituto de Investigación Sanitaria
Aragón (IIS Aragón)

Desarrollo de anticuerpos bi-específicos y terapias celulares avanzadas CAR para las neoplasias mieloproliferativas crónicas cromosoma Filadelfia negativas clásicas (NMC-FN)

D. Alberto Carcasona

Universidad de Zaragoza (UNIZAR)

Evaluation of the effect of physical exercise on the quality of life in adult oncological population

D. Yeray Sañudo

Universidad de Zaragoza (UNIZAR)

Integration of data-driven tools and service design methodologies to transform decision-making processes during oncology treatment
