

Ayuda Investigador AECC 2024

Adjudicatarios

Dra. Paula Díez Sánchez

Instituto de Investigación Sanitaria
La Fe (IISLAFE)

Cancer fight from a nanotechnological approach: self-propelled nananoparticles to improve drug penetration into tumors

Dr. Jorge Barbazán García

Instituto de Investigación Sanitaria de
Santiago (IDIS)

RadGlioMat: New biomaterial-based approaches to tackle radiation resistance in Glioblastoma

Dr. Fidel-Nicolás Lolo Romero

Centro Nacional de Investigaciones
Cardiovasculares (CNIC)

Immunomechanics: a new paradigm for understanding cancer immune infiltration and improving immunotherapy

Dra. Lucía Sanjurjo Bouza

Instituto de Investigación Sanitaria de
Santiago (IDIS)

Nanotechnology to Advance Cellular Therapies (AVANTE): mRNA nanocarriers for in vivo T cell reprogramming

Dr. Giuseppe Bosso

Centro Nacional Investigaciones
Oncológicas (CNIO)

A non-canonical role for BRAF in telomere biology and cancer

Dra. María Teresa Blasco Lázaro

Instituto de Investigación Biomédica
(IRB Barcelona)

Importance of MAF in the establishment of breast cancer metastasis and identification of persistent breast cancer cells mediating multiorgan metastasis

Dr. Mattia Ghirardello

Instituto de Biocomputación y Física
de Sistemas Complejos (BIFI)-
Zaragoza

Specific galactosyltransferases inhibitors: rational design, synthesis, biochemical characterization, and preclinical validation of novel anticancer agents
