

Ayuda Clínico Junior en el Territorio AECC 2025

Adjudicaciones

Dr. Víctor Albarrán

Fundació de Recerca Clínic Barcelona-
Institut d'Investigacions Biomèdiques
August Pi i Sunyer

Intra-tumor heterogeneity and clinical
impact in HER2-positive and triple-
negative early breast cancer

Dr. Luís Esteban Tamariz

Cancer Center Clínica Universidad de
Navarra (CCUN)

Development of novel approaches to
improve CAR-T therapies using single-
domain antibodies for the treatment of
multiple myeloma

Dr. Carlos López

Instituto de Investigación Sanitaria
Fundación Jiménez Díaz (FJD)

Molecular prognostic factors for relapse
related to genotype and
immunomodulation in localized
gastrointestinal stromal tumor (GIST)

Dr. David Martínez

Instituto de Investigación Sanitaria La
Fe (IISLAFE)

Implementación del mapeo óptico
genómico y secuenciación del exoma
completo en el estudio de pacientes con
mieloma múltiple de nuevo diagnóstico

Dr. David Luengo

Hospital Universitario Virgen de las
Nieves

Identification and analysis of imaging
biomarkers to optimize the approach to
locally advanced rectal cancer using
artificial intelligence and radiomics
techniques

Dr. Eduard Teixidor

Instituto de Investigación Biomédica de
Girona (IDIBGI)

Identification of immunotherapy-related
biomarkers in lung cancer: integration of
population data and liquid biopsy with a
focus on patients with brain metastases

Dra. Bárbara Antonia Malave

Instituto de Investigación Sanitaria Pere Virgili (IISPV)

Clinical decision-making through longitudinal assessment of liquid biopsy, radiomics, and metabolomics in non-metastatic prostate cancer treated with radiotherapy.

Dr. Javier Alberto Rojas

Instituto de Investigación Sanitaria de Santiago (IDIS)

Multimodal machine learning for precision diagnosis and prognosis in myeloid neoplasms: An integrated approach using clinical, genomic, imaging, and spatial transcriptomic data

Suplentes

Dra. Marta Sant

Hospital del Mar Research Institute

Immune/stromal biomarkers as predictors of response to immunotherapy in colorectal cancer

Dr. Antonio Jesús Muñoz

Instituto de investigación Biomédica
Hospital Universitario La Paz
(IdiPAZ)

Patient-Derived Xenografts (PDX) models validation as a therapeutic planning tool in pediatric oncology

Dr. Joaquín Andrés Castillo

Fundació de Recerca Clínic
Barcelona-Institut d'Investigacions
Biomèdiques August Pi i Sunyer

Efficacy and safety of a dendritic-cell based vaccine loaded with frameshift-derived neopeptides in Lynch syndrome
