

Ayudas Sinergias AECC 2026

Adjudicaciones

Dra. Irene Felipe

Centro Nacional Investigaciones
Oncológicas (CNIO)

ER Stress and Metabolic Reprogramming
in Pancreatic Tumor Initiation

Dr. Jose Garrido

Instituto de investigación Hospital 12
de octubre (i+12)

Sensitize cold tumors to immunotherapies
through innate immune training of
macrophages

Dr. Pedro Luis Justicia

Cancer Center Clínica Universidad de
Navarra (CCUN)

Development of next generation HLA-
independent T cell receptors targeting
HER2+ brain tumors

Dra. Diana Fernandes

Vall d'Hebron Instituto de Investigación
(VHIR)

Engineered Limosilactobacillus reuteri as a
Multifunctional Probiotic for Colorectal
Cancer Therapy: Leveraging Microbiota-
Immune Synergies (Lac2Colon)

Dr. Aitor Manteca

Centro de Investigación Cooperativa
en Biomateriales (CIC biomaGUNE)

CRYPTIC-DROP: Conditional Recognition
of crYPTIc paratopes using DROplet
Platforms

Suplentes

Dra. Oihane Mitxelena

Instituto de Investigación Sanitaria
Biogipuzkoa (IIS Biogipuzkoa-
Biodonostia)

Bioinspired 3D models of lung
adenocarcinoma bone metastases as a
clinically informed therapy-testing
platform for personalized medicine

Dr. Carlos Ruiz

Cancer Center Clínica Universidad de
Navarra (CCUN)

Deciphering tumor microenvironment
vulnerabilities in pediatric High-Risk
Gliomas for Targeted Oncolytic therapy

Dra. Lucía Simón

Centro Andaluz de Biología Molecular
y Medicina regenerativa (CABIMER)

Investigating the role of CIC in the
response and toxicity to MAPK inhibitors in
melanoma

Dra. Beatriz Parejo

Instituto de Investigación Sanitaria
Aragón (IIS Aragón)

Role of hyaluronic acid in mediating
stemness and reprogramming of the lipid
metabolism in peritoneal carcinomatosis
